Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 50 and 51 are rejected under 35 U.S.C. 103(a) as being unpatentable over Campbell (GB 303,593, previously cited) and Hubbard et al.

Campbell discloses the claimed device except it is unclear if the opposing lateral edges comprise heat seals. Hubbard et al. discloses that it is known in the art to form analogous bladders from two flat sheets heat sealed together along their outer peripheral edges. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the hot water bottles of Campbell by heat sealing two flat sheets together along their outer peripheral edges, as in Hubbard et al., in order to provide a hot water bottle that is leak-proof/leak-resistant along its edges. Furthermore, applicant has not disclosed that heat-sealing along lateral edges of a bag solves any stated problem or is for any particular purpose and it appears that the Campbell invention would perform equally well with heat seals along its edges.

Regarding claim 51, at least one of the edges extending from the left or right side of the funnel-like portion in Campbell comprises substantially an S-shape as claimed.

Response to Arguments

3. Applicant's arguments with respect to claims 50-51 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
